CORPORATE ENVIRONMENTAL POLICY STATEMENT

As responsible corporate citizens, Naval Support Activity Crane and its Tenant Activities, are committed to the protection of human health and the environment through education, pollution prevention, and the investment of resources necessary for continual improvement and compliance with respect to our Environmental Management System.

Consideration of the environment will be an integral part of our decision-making process. Our success in remaining a competitive organization depends on our ability to manage resources, anticipate change, and comply with increasingly complex environmental regulations. We will implement effective resource management, hazardous materials minimization, and continuous process improvement to prevent pollution and eliminate waste.

In concert with the accomplishment of our mission goals, we will:

- Be sensitive to and responsible for the environment;
- Integrate environmental management into our business and decision-making processes, regularly measure our performance, and practice continual improvement;
- Minimize the wastes we produce through employee education, increased planning, process improvement and recycling;
- Comply with all applicable environmental, legislative, regulatory, permit and other requirements;
- Conduct our operations in a manner that prevents pollution, conserves resources, and proactively addresses past environmental contamination;
- Provide a safe and healthful workplace and ensure that personnel are properly trained and have appropriate safety and emergency equipment.
