Press Release

NAVSEA to Hold Recruiting Event at SHPE

WASHINGTON -- The Naval Sea Systems Command (NAVSEA) will conduct interviews for engineering positions during the Society of Hispanic Professional Engineers (SHPE) conference in Cincinnati, Ohio, Oct. 27-30.

NAVSEA will also feature guest speakers and hardware demonstrations reflecting the scope of NAVSEA’s work and mission, as well as the variety of engineering positions available throughout the United States.

“The SHPE conference is a great venue for us to educate young men and women on the many job opportunities NAVSEA has to offer,” said Tim Troske, Naval Surface Warfare Center Port Hueneme technical director. “We’re an organization of more than 50,000 employees worldwide, more than 95 percent of whom are civilian. You don’t have to wear a uniform to work for the Navy.”

NAVSEA’s speakers at the event include U.S. Navy Capt. Heidi Stefanyshyn-Piper, Navy diver and astronaut; Michael Dean, engineer and deputy director of Ocean Engineering, Supervisor of Salvage and Diving; and Roberto Diana, surface ship water systems engineer.

“The breadth of our guest speakers is representative of the diversity of NAVSEA’s work, as well as our workforce,” Troske said. “Our naval engineers are involved in everything from building ships, to the Gulf oil cleanup, to green technology. We’re looking for individuals with science and engineering backgrounds to work with us on these and other cutting-edge efforts.”
