N65540 - NSWC CARDEROCK DET PHILA	N65540 - NSWC CARDEROCK DET PHILA	DDG51 Class Machinery Control Systems Support	DDG 51 Class ships require modernization-engineering and life-cycle engineering support. This effort is to help ensure readiness and safety criteria are met. The work to be performed includes all activities associated with Machinery Control System (MCS) computer program development, testing, and installation on both in-service and new-ship-construction of DDG 51 Class ships. The Machinery Research and Engineering Department (Code 50) provides systems engineering and technical management of ship systems and equipment including In-Service Engineering (ISE) and Life Cycle Engineering Management (LCEM) for the U.S. Navy Ship systems. Data Acquisition Systems (DAS), First-in-class testing. Submarine Maintenance Management Information The objective of this contract is to establish the level of effort of support needed for providing Engineering, logistics, computer engineering services, and training support for NSWC Philadelphia. NSWCPD requires support for support for deployed systems such as TSIMS, ICAS, and other installed systems.
