

This is a synopsis/presolicitation notice for a commercial supply purchase. It is intended to award a Firm Fixed Price (FFP) to New River Kinematics INC, a small business, on a sole source basis.

The Naval Surface Warfare Center Philadelphia Division (NSWCPD) has established a requirement for Operation and Maintenance to purchase software licenses for a metrology tool that interacts with current Navy equipment in the Modeling & Simulation Laboratory. NSWCPD already owns the licenses for New River Kinematic's proprietary software tool "SpatialAnalyzer" and intends to procure a renewal of this license.

The Government intends to solicit and negotiate with only one source under authority of FAR 6.302-1. Interested persons may identify their interest and capability to respond to the requirement or submit proposals. This notice of intent is not a request for competitive proposals and does not constitute a solicitation. However, all RFQs received prior to the closing date will be considered by the Government. A determination by the Government not to compete this proposed action based upon responses to this notice is solely within the discretion of the Government. Information received will normally be considered solely for the purpose of determining whether or conduct a competitive procurement.

A hard copy of the solicitation will not be made available. Offerors must be registered in the Central Contractor Registration (CCR) database to be considered for award. See <https://www.sam.gov/portal/public/SAM/> for further information and instructions. For further questions regarding this announcement, please contact Derek Diep, via email at derek.diep@navy.mil. Phone calls will not be accepted.
