We Support
Today’s Fleet
Tomorrow’s Fleet
and the Fleet after

Department 60
Naval Surface Warfare Center – Carderock Division

Distribution Statement A - Approved for public release; distribution is unlimited.
**Mission**
Provide fundamental enabling technologies for enhanced ship integrity and performance. Conduct full spectrum research, development, testing, life-cycle management, and in-service engineering in the areas of:
Vision
We will be the Navy's premier provider in survivability, structures, materials and environmental knowledge enabling the fleet and it's warfighters to perform all missions safely and effectively.

Technical Capabilities

CD 14: Surface, Undersea and Weapon Vehicle Materials and Manufacturing Technologies
CD 15: Surface & Undersea Vehicle Structures
CD 16: Alternative Energy and Power Sources R&D
CD 17: Liquid Waste Management, Science and Systems
CD 18: Solid Waste, Hazardous Supply & Radiation Technology Management, Science and Systems
CD 20: Surface, Undersea and USMC Vehicle Vulnerability Reduction and Protection
CD 25: Radiation Detection Technology Research and Management
Materials & Manufacturing Division (Code 61)

- **Welding, Processing & NDE**
  - Acquisition and ISE support
  - RDT&E on welding, processes, NDE, hull husbandry automation, and AM structures
  - Automated underwater hull surveys
  - Experts in welding consumable design and development

- **Additive Manufacturing Project Office**
  - Advancing the AM science
  - Navy Center of Knowledge
  - Developing certification processes for parts
  - Coordinating SYSCOM and DoN efforts

- **Propulsor Manufacturing Office**
  - Navy lead for Virginia Class Propulsor construction
  - Direct the design, development, manufacturing and acquisition of propulsors

- **Physical Metallurgy and Fire**
  - RDT&E, S&T, and ISE services for naval alloys
  - Metallurgical analyses and characterization
  - Supply failure analyses
  - Magnetostrictive materials
  - Evaluating the fire performance

- **Corrosion & Coatings Engineering**
  - Experts in R&D, S&T, acquisition, and ISE for naval and expeditionary environments
  - Develop mitigating technologies
  - Experts in biofouling and antifouling agents

- **Non-Metallic Mat’ls Research & Eng.**
  - RDT&E, S&T, acquisition, and ISE services
  - Experts in high temperature ceramic applic.
  - Experts in polymer processing applic.
  - Fabricator of acoustic absorbing/reflecting tiles

Distribution Statement A - Approved for public release; distribution is unlimited.
Environmental and Energy Division (Code 63)

- Radiation Technology and EOSH in Ship Acquisition
  - Certified Principal for Safety services for Navy ship acquisition programs
  - Environmental and radiation OSH technologies and processes
  - Radiation technical standards development
  - RDT&E, calibration, and fielding of radiation instruments and sensors

- Wastewater Management
  - Experts on domestic and international environmental policies, leaders of the DoD Uniform National Discharge Standards (UNDS) Program
  - RDT&E of oily, ballast, grey, and black wastewater treatment technologies and processes
  - Engineering support for shipboard treatment systems, shore facilities, and installations
  - Advise acquisition programs on system selection

- Solid Waste, Pollution Prevention Afloat, & Hazardous Material Management
  - RDT&E of solid waste systems and equipment for surface and submarine fleet integration
  - Development of procedures and processes for hazardous material management in the fleet
  - ISE services for subsurface fleet
  - Advanced non-skid and hull surface cleaning technologies
  - Engineering support for shore facilities and installations

- Advanced Power & Energy
  - RDT&E, S&T, and acquisition support to NAVSEA programs and USMC
  - Experts on energy storage (batteries), certification, and safety
  - Engineering support of portable and hybrid power systems and fuel cells for forward deployed expeditionary sites
Structures and Composites Division (Code 65)

- **Ship Structures**
  - RDT&E, S&T, acquisition, and ISE services
  - Validate contractor designs to standards via FEA
  - Develop design methodologies and software tools for surface ships and composite structures

- **Submarine Structures & Propulsors**
  - RDT&E, S&T, acquisition, and ISE services
  - Validate contractor designs to standards
  - Develop design methodologies and software tools for pressure hulls, composite structures and propulors

- **Performance and Evaluation**
  - RDT&E, S&T, acquisition, and ISE services
  - Measure full and model scale test articles
  - 3D measurement capabilities
  - Rough water trials to validate design loads

- **Criteria and Assessment**
  - RDT&E, S&T, acquisition, and ISE services
  - Develop criteria to assess naval structures
  - Use analytical simulation models to quantify lifetime structural reliability and validate measure responses

- **Advanced Materials and Structures**
  - RDT&E, S&T, acquisition, and ISE services for composite materials
  - Develop and evaluate composite and lightweight design and evaluations
  - Composite patch repair of cracked alloys
Survivability and Weapons Effect Division (Code 66)

• Underwater Explosions R&D
  – R&D and acquisition support services
  – Improving methods and procedures for shock hardening
  – Provide advanced M&S services to predict damaging effects of UNDEX on surface and submarine hulls

• Dynamic Measurements & Testing
  – RDT&E and acquisition support services
  – Measure dynamic pressure loads of ship and submarine structures
  – Preparing for the LCS-5 and-6 Full Ship Shock trials
  – Validate analytical predictions

• Hull Response & Protection
  – RDT&E, S&T, and acquisition services
  – M&S of ships, subs, and USMC vehicles responses from weapons effects
  – Develop structure, armor, and mitigation techniques to improve survivability

• Vulnerability Assessment
  – Experts in Live Fire Test & Evaluation and Total Ship Survivability Trials
  – M&S to assess primary and secondary damage and recoverability actions

• Survivability and Weapon Effects M&S
  – R&D and eventual acquisition services
  – Developing new MS technologies for advanced weapon effect simulations
Overview of Active Contracts

Small Business Contracts 64% of Portfolio
