

Universal Tactical Trailer

**Presented by
John Schneider**

Patent Application # 12,609,958

TECHNOLOGY DESCRIPTION

- 
- **What is it? Universal Tactical Trailer**
 - **How is it made? Machining, and Welding**
 - **What makes it special? Provides universal trailer hitch to connect a trailer to either a 5th wheel or pintle mount.**
 - **Why did you make it? More Utility for the Warfighter**

TECHNOLOGY DESCRIPTION

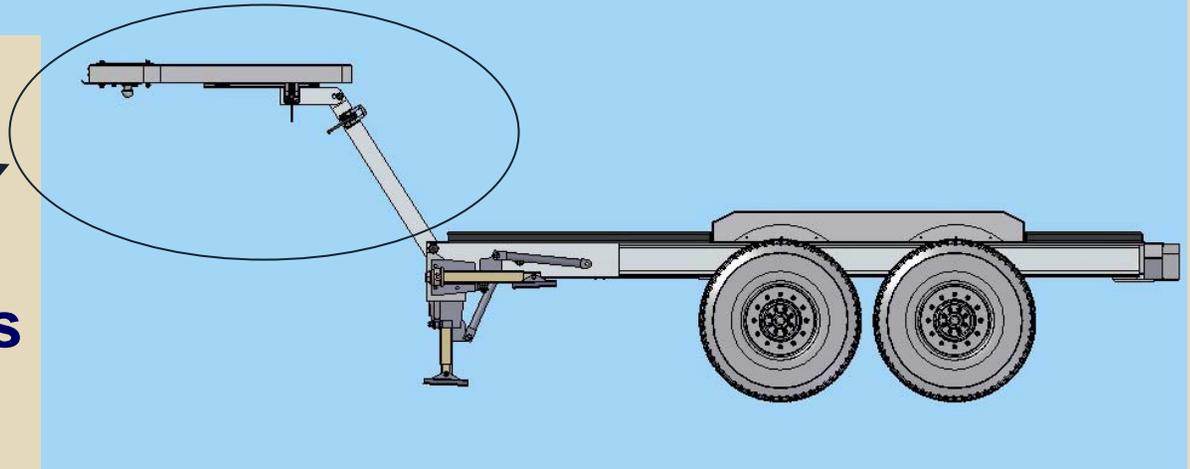

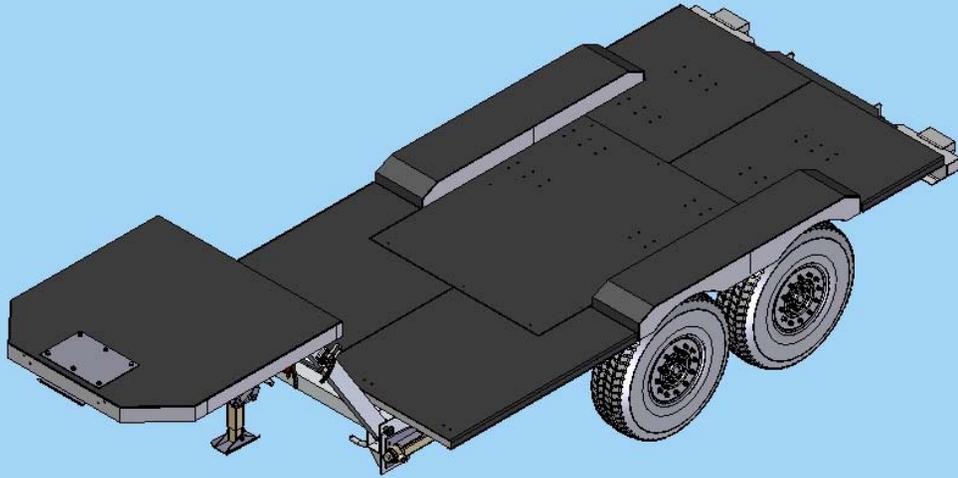

- **What are its limitations?**
 - Two Current Trailer Connections.
- **What are the main components?**
 - Same as Most trailers, including transformation characteristics

- **What are its main capabilities?**
 - The ability to be changed to use the best payload configuration or available pull configuration
- **Status:**
 - Technical data package developed and initial prototype built

- 
- **Who would use it?**
 - Farmers, Transportation Agencies, Trucking lines.
 - **Why would they want it?**
 - Farmers could use the Pintle with a Draw bar in the field. Then transform it to 5th wheel, so it could then be pulled efficiently to the Feed Mill or Granary.
 - Commercial Trucking/Transportation could utilize it to be more efficient on hauling loads.
