**Naval Surface Warfare Center**

**Naval Undersea Warfare Center**
The NAVSEA Warfare Centers (WCs), which include Naval Surface Warfare Center (NSWC) and Naval Undersea Warfare Center (NUWC), represent approximately 30 percent of the Navy’s engineering and scientific expertise. The NAVSEA WCs employ more than 20,000 scientists, engineers, and support personnel within nine Divisions located across the United States.

The primary role of the NAVSEA WCs is to help make Naval programs successful by providing unbiased technical advice and solutions to our partners, namely the NAVSEA Program Executive Offices (PEOs), the fleet, the Marine Corps, the Office of Naval Research (ONR), the Department of Defense (DoD) and the Defense Advanced Research Projects Agency (DARPA). Our scientists, engineers, and technicians provide technical advice and solutions across the entire “full-spectrum” lifecycle of platforms and systems – from “cradle to grave.”

Small Business Opportunities

The Warfare Centers historically award one-third of their contracting dollars to small businesses, exceeding $1 billion annually. The Directors of Small Business advise the WCs on all matters related to small business and are committed to maximizing the contributions of small business in acquisitions both as prime contractors and subcontractors. We provide leadership and governance to meet the needs of the nations’ Warfighters, creating opportunities for small businesses while ensuring each tax dollar is spent responsibly. WC contracts with small businesses account for about 30 percent of that total, and many of these awards are set-aside specifically for small businesses.
