1. **SCOPE:**

   1.1 Title: Globe, Globe Angle, and Globe Stop Check Valve; repair

2. **REFERENCES:**

   2.1 S9086-CJ-STM-010/CH-075, Fasteners

   2.2 S9253-AD-MMM-010, Maintenance Manual for Valves, Traps, and Orifices (Non-Nuclear), User's Guide and General Information

   2.3 S9086-RJ-STM-010/CH-504, Pressure, Temperature and Other Mechanical and Electromechanical Measuring Instruments

   2.4 S9086-RK-STM-010/CH-505, Piping Systems

3. **REQUIREMENTS:**

   3.1 Matchmark each valve part.

   (V) "INSPECT PARTS FOR DEFECTS"

   3.2 Disassemble, clean each internal and external surface free of foreign matter (including paint), and inspect each part for defects.

   3.2.1 The removal of body-bound studs only to determine the condition of threads is not required.

   (I) or (V) “TORQUE TEST” (See 4.3)

   3.2.2 Torque test each body-bound stud in accordance with Section 075-8.6.3.2(d) of 2.1.

   3.3 Repair valve as follows:

   3.3.1 Straighten stem to within 0.002-inch total indicator reading. Polish stem to a 32 Root-Mean-Square finish in way of packing surface and remove raised edges and foreign matter.

   3.3.2 Chase and tap each exposed threaded area.
3.3.3 Dress and true each gasket mating surface.

3.3.4 Machine, grind, or lap and spot-in disc to seat to obtain a 360-degree continuous contact.

(I) or (V) "INSPECT CONTACT" (See 4.3)

3.3.4.1 Inspect contact using blueing method (soft seated valves excluded).

3.3.4.2 Transfer line (hard seated valves) shall not exceed 1/16-inch in width.

(I)(G) "VERIFY LEVEL I PARTS AND CLEANLINESS"

3.4 Assemble each valve installing each new gasket and each fastener for those removed in 3.2 in accordance with manufacturer's specification or instruction.

3.4.1 Pack feedwater, condensate, and steam valves with valve stem packing conforming to MIL-P-24503/24583 combination in accordance with Chapter 6 of 2.2.

3.4.2 Pack valves of systems other than feedwater, condensate, or steam with valve packing conforming to MIL-P-24396, Type B.

3.5 Hydrostatically test valve as follows:

3.5.1 Hydrostatic test equipment shall have the following capabilities:

3.5.1.1 Manual overpressure protection release valve.

3.5.1.2 Self-actuated and resetting relief valve with a set point no greater than 100 PSIG above the test pressure or 10 percent above the test pressure, whichever is less.

(V) "GAGE CHECK"

3.5.1.3 Master and backup test gages with gage range and graduation in accordance with Table 504-6-1 of 2.3. The backup gage shall be cross-checked to the master hydrostatic test gage up to the maximum test pressure just prior to start of testing. Master and backup gages shall track within 2 percent of each other.

3.5.1.4 Protection equipment shall be accessible and test gages shall be located where clearly visible and readable to pump operator and inspector.

(V)(G) or (I)(G) "SEAT TIGHTNESS" (See 4.4)
3.5.2 Test for seat tightness in the direction tending to open valve.

3.5.2.1 Do not exceed the handwheel closing force specified in Table 505-11-2 of 2.4.

3.5.2.2 Test shall be continued for a minimum of 3 minutes if there is no evidence of leakage, or in the event of visible leakage, until accurate determination of leakage can be made. Maximum allowable leakage: 10 cubic centimeters (cc) per hour, per inch of nominal pipe size; 10 cc maximum per hour for valve sizes less than 1-1/2 inches.

(V)(G) or (I)(G) "SEAT TIGHTNESS" (See 4.4)

3.5.3 Back pressure test globe stop check valve with stem in the open position. Allowable leakage as follows:

<table>
<thead>
<tr>
<th>VALVE SIZE (NOM)</th>
<th>LEAKAGE RATE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 2 inches inclusive</td>
<td>25 cc/hr./in. dia.</td>
</tr>
<tr>
<td>2-1/2 inches - 10 inches inclusive</td>
<td>50 cc/hr./in. dia.</td>
</tr>
<tr>
<td>Over 10 inches</td>
<td>100 cc/hr./in. dia.</td>
</tr>
</tbody>
</table>

The back pressure applied shall be in accordance with the following:

<table>
<thead>
<tr>
<th>VALVE PRESSURE RATING</th>
<th>TEST BACK PRESSURE</th>
</tr>
</thead>
<tbody>
<tr>
<td>150 PSIG and below</td>
<td>50 PSIG</td>
</tr>
<tr>
<td>Over 150 PSIG</td>
<td>100 PSIG</td>
</tr>
</tbody>
</table>

4. NOTES:

4.1 The test pressures of 3.5.2 will be specified in Work Item.

4.2 Repair of valve operating gear will be specified in Work Item.

4.3 The paragraph referencing this note is considered an (I) if the valve is Level I. If the valve is not Level I, the paragraph is considered a (V).

4.4 The paragraph referencing this note is considered an (I)(G) if the valve is Level I. If the valve is not Level I, the paragraph is considered a (V)(G).

4.5 Test medium will be specified in Work Item.
