# Get to know NAVSEA

## Overview

We engineer, build, buy and maintain ships, submarines and combat systems for the U.S. Navy. With a budget of \$30 billion, NAVSEA accounts for one-quarter of the Navy's annual spending.

NAVSEA manages more than 150 acquisition programs and is responsible for establishing and enforcing technical authority in ship and combat system design and operation. NAVSEA also manages foreign military sales cases for the construction and modernization of ships and systems for partner nations.

Headquarters Command Staff and Directorates: NAVSEA headquarters provides policy, guidance, oversight and support in the areas of financial management, contracting, logistics/maintenance/industrial operations, engineering, undersea warfare, corporate operations, information technology, legal support and security.

Program Executive Offices (PEOs): NAVSEA's affiliated PEOs — PEO Ships, PEO Submarines, PEO Aircraft Carriers, PEO Littoral Combat Ship, and PEO Integrated Warfare Systems — are responsible for the development and acquisition of Navy and Marine Corps platforms and weapons systems. They report to the Assistant Secretary of the Navy for Research, Development and Acquisition for acquisition-related matters and to the NAVSEA commander for planning and execution of in-service support.

Naval Shipyards and Regional Maintenance Centers: Owned by the fleet and operated by NAVSEA, the four naval shipyards — Portsmouth, Norfolk, Puget Sound and Pearl Harbor — maintain, repair, modernize, inactivate, dispose of and provide emergency repair to U.S. Navy ships, systems and components. The Regional Maintenance Centers — CNRMC, MARMC SERMC and SWRMC — provide ship repair, industrial, engineering and technical support services for ships, including procurement and administration of contracts for ship maintenance and modernization. These centers also train Sailors in the maintenance and repair of shipboard systems and components.

Supervisors of Shipbuilding (SUPSHIPS): NAVSEA's four SUPSHIPS — Bath, Groton, Gulf Coast and Newport News — execute shipbuilding contracts and provide oversight of cost, schedule and quality for Navy ships being built or repaired at private shipyards.

NAVSEA Warfare Centers: The Naval Surface Warfare Centers (NSWC) and the Naval Undersea Warfare Centers (NUWC) are technical institutions dedicated to sustaining warfighting readiness. Warfare center scientists and engineers at 10 divisions across the United States provide expertise in support of research, development, test and evaluation, engineering and fleet support.

Other Field Activities: NAVSEA also directs several field activities that support the warfighter in a myriad of areas, including ship life cycle management, ordnance safety and security, experimental diving, submarine maintenance, logistics and testing of surface combat systems.

NAVSEA is comprised of approximately 80,200 civilian and military personnel in 40 activities located across the United States and Asia.
