Discrete Semiconductors Packaging

Use this section to find and select Discrete Semiconductor packages. The Joint Electronic Device Engineering Council (JEDEC) JC-11 Committee on Mechanical Standardization creates outlines in Publication 95 (JEDEC Registered and Standard Outlines for Semiconductor Devices) for Standard Semiconductor packages. When designing a package, emphasis should be on using the part packages from the QML-19500 manufacturers, from MIL-HDBK-6100, or from the JEDEC publication 95. Figure 1 depicts some different package styles of Discrete Semiconductors.
