

CAD/PAD International Logistics Meeting (ILM)

Web Ordering

Capt. Scott H. Kraft, USN
Commanding Officer

Mr. Ashley G. Johnson, SES
Technical Director

- 11 June 2019 -

Overview

- What is web ordering
- Future plan and goals
- Things to remember
- Questions

What is Web Ordering?

- Web based system that allows users to order CADs/PADs for maintenance (scheduled/unscheduled), emergency stock, emergency replacement and depot repair

Recent Changes

- Two points of contact (POC) are now required when placing orders
- VFS will not allow order to be submitted if POC fields are blank

Place a Survival/Test CAD/PAD Order

Tuesday, April 30, 2019 - 9:07:48 AM

Need By Date: 5/14/2019	Days To Requested Date: 14	Lead-Time Days: 14
No System Messages to Display		

Please Enter Required POC Information Below:

-	POC 1	POC Name	Phone 000-000-0000
-	POC 2	POC Name	Phone 000-000-0000

Please give a justification/comment in each of the Comment areas below.

Recent Changes

- SLE verbiage on Order Status screen

Order Details

Items Shipped/Received

DODIC	Qty	Document Number	Item Status	Shipping Batch

Future Plan and Goals

- Preventing duplicate orders by bureau number
- Email notification automatically sent to orderer when notes are added
- VFS newsletter
- Offer tools to the fleet to make the web ordering process as easy of a process as possible
- Specific air shipment via FedEx dash 2 class being offered to ease the burden of no dash 2 person at the squadrons

Things to Remember

- Missing paperwork is NOT a reason to reject a package
 - Registered users can request missing/replacement paperwork via VFS, web ordering, return paperwork menu button
 - Replacement paperwork is sent to the squadron via FedEx
- Tracking via IGC is available to all
 - <https://www.igc.ustranscom.mil/igc/>

Things to Remember (con't)

- Training on most VFS related topics is available

The screenshot displays the CAD/PAD Virtual Fleet Support Training System website. On the left, a navigation menu includes sections like 'MODULE MENU', 'USER MANAGEMENT', 'TRAINING LIST', and 'VFS INFORMATION'. The 'CAD/PAD Web Training' link is highlighted. The main content area features a large image of a pilot in a cockpit and a fighter jet. Below the image is a 'Get Started' section with three links: 'CAD/PAD', 'Virtual Fleet Support', and 'Registration', each with a brief description and a small image.

Distribution Statement A (19-080): Approved for Public Release. Distribution unlimited.
