ANNUAL
Awards
NSWC PANAMA CITY DIVISION

Ensuring Warfighting Dominance
in the Littoral Battlespace

About

The NSW PCD Annual Awards, also known as the Commanding Officer and Technical Director (CO/TD) Awards, is a prestigious event that provides the Command with the opportunity to showcase and acknowledge the great work accomplished by our civilian employees here at NSW PCD. This event highlights achievements and provides knowledge about future initiatives. This event has been held for many years with hundreds of recipients.

Each year, individuals are selected amongst a highly competitive pool of nominees. The accomplishments, accolades, and the great work of our people here at NSW PCD are too numerous to count. To every nominee and each member of the NSW PCD family who impacts our mission daily, the CO/TD say "thank you" to all.

Each year, one individual is inducted into the NSW PCD Hall of Fame. The employee must have been retired from NSW PCD a minimum of 5 years.

Congratulations to this year's winners.

Fame *Hall of*

PRESENTED TO Barry Miller

For his notable contributions to the Naval community, Mr. Barry Miller is awarded the Hall of Fame award.

Throughout his career and to this day, Mr. Miller is considered a subject matter expert in diving and life support systems where his opinions are highly valued. His primary supported system was wildly successful, and though it was used in the most extreme environments that a Navy diver has ever been exposed to, there was never any loss of life resulting from the use of the system. It is through his direct interaction with sponsors, hiring, mentoring, guidance, and leadership that the Diving and Life Support Division today is extending the capability of Navy diving and is prepared to support diving and other life support programs into the future. Mr. Miller retired in 2007, but his long-lasting effect on the organization and its personnel will be felt well into the future.
