

"PROUD OF OUR PAST,  
READY FOR THE  
FUTURE"

Every day we have the honor of serving our country. We support the men and women in the United States Navy by delivering a safe and modernized vessel ready to defend our freedom.

Portsmouth Naval Shipyard: Over a 100 years of dedicated service to support submarine construction, repair and modernization.

Be a part of history as the urgent need for modernization proves imperative to our future

# RADIOLOGICAL MONITORING DIVISION

SERVING THOSE  
WHO DEFEND OUR  
FREEDOM

Kittery, ME 03904

# WHO ARE WE?

## Radiological Control (RADCON)

Division is a diverse team of Radiological Control Technicians (RCT's) who performs direct oversight of radiological work in order to maintain conformance with strict federal and local procedures.

Radiological Control Technicians will have an aptitude for detail and can work with others to ensure high standards of radiological work are upheld.

# WHAT WE DO

As an integral part of helping the Navy strengthen our national defense, we work with highly trained mechanics to perform repair work on nuclear powered submarines.

# TRAINING

In addition to on the job training, Radiological Control Technicians are required to attend six months of specialized training at a qualification school in Norfolk, VA.

Potential offsite job trips to:

- California
- Hawaii
- Virginia
- Washington State
- And more!
