

NAVAL EXPEDITIONARY COMBAT COMMAND
STANDARD WORK CENTER CODES

NOTES:

1. It is recommended all units under COMNECC and COMNECCPAC develop a tool room or shop for maintenance and distribution of tools used for maintenance.
2. Some units are not large enough to incorporate three different Communication Work Centers. In such cases, all aspects of Information Technology will be incorporated into one Work Center (e.g. CS02).
3. All numbered deployable detachments that serve a specific purpose as listed in this instruction will use the first two letters as indicated in Appendices C2A through C2M and numbers unique to that detachment provided it is not duplicated within the Echelon IV Group command.
4. Shore Detachments assigned outside the continental United States will use the two-letter country code in which they are located. Detachments within the United States must use appropriate designator identified within this Appendix.
5. Multiple boat and service craft Work Centers will use consecutive numbering to identify follow on Work Centers of the same type (e.g., CA01, CA02, etc.) whenever possible.
6. MDS reporting and ASI processing for multiple commands combined within a single MDS database will be managed via the echelon IV Group Work Center code XX01.

NOTES:

1. Explosive Ordnance Disposal Expeditionary Support Units reside within MDS as a department under the Explosive Ordnance Disposal Group. MDS reporting is transmitted under the Explosive Ordnance Disposal Group's Unit Identification Code. ASI records are processed under the Explosive Ordnance Disposal Group's MDS Work Center code XX01. Explosive Ordnance Disposal Groups manage MDS department and division codes.
2. Work Center codes listed above with a '##' value are standardized by the Explosive Ordnance Disposal Group and must be unique within the MDS database. Additionally, Work Center codes assigned to a numbered deployable detachment (e.g., platoon) will be unique to that Work Center within the Explosive Ordnance Disposal Group.
3. Expeditionary Support Element Work Centers will be numbered in relation to the task force or task group they support (e.g., ESE work centers supporting TF56 will be coded 56).
