NAVAL SURFACE FORCE SHIPS AND SHORE COMMANDS  
STANDARD WORK CENTER CODES FOR  
**LCS CLASS SHIPS**

**LCS MISSION MODULES - 4 DEPARTMENTS**

The work center assignments will be as follows: (This will be based on the number and LCS hull number the module is assigned.)

SHORE DEPARTMENT	SH01 to SH99
Note 1: The shore department receives all of the material and tracks the maintenance of the gear while at the MPSF. All initial assignments of equipment and equipage will be work center SH01. The SH01 will be the secondary work center on all configuration records to allow for the ordering of parts while the module is deployed.	
ASW DEPARTMENT	AS01 to AS99
Note 2: For all ASW based Mission Modules	
SUW DEPARTMENT	SU01 to SU99
Note 3: For all SUW based Mission Modules	
MCM DEPARTMENT	MC01 to MC99
Note 4: For all MCM based Mission Modules	

Each of the departmental structures will be broken down into work centers, using the first 2 letters of the department. There is one work center for each Mission Module. There can be a maximum of 99 work centers under each department.

To place the gear in a different department or work center, just change the work center assignment for the record. Upline reporting informs CDMD-OA of the change, or communication with the CDM so they can do bulk changes.

Include the PMS team at NAVSEALOGCEN when making the changes to keep PMS data updated.

The MPSF will receive and serialize the equipage then assign to the correct mission module.
