	ARMORY	WG01	

NOTES

- (1) For the purposes of standardization and reporting, compliance with work center standards is required whenever possible. Deviations from the standard must be approved by TYCOM (CNIC Program N-Code) before initiating a feedback report and implementing at the Installation level.
- (2) Can be utilized as sole work center for commands where reduced size and/or configuration make it functionally impractical to utilize all work centers and for equipment that does not align with any other

**STANDARD WORK CENTER CODES FOR
NAVY INSTALLATIONS COMMAND (CNIC)**

WC. All aspects of other work centers utilizing same WC code (i.e. OE, OS, SH) can be incorporated into this work center with TYCOM approval.

- (3) Each of the divisional structures will be broken down into work centers, using the first two letters of the division. There is one work center for each tugboat, service craft or boat assigned. Each installation tugboat, service craft, and/or boat will be locally assigned a sequential number (e.g. tugboat 01, 02, 03... / service craft 01, 02, 03... / boat 01, 02, 03...). "XX" represents the assigned number.
- (4) Tugboat maintenance and support will be aligned under **TG** work center; Floating crane (YD), YFN, YOGN, SWOB, berthing barge, YRR, Y-CRAFT aligned under **SC** work center; and barrier boats, harbor security boats, oil spill response boats, dive boats, personnel transfer boats aligned under **BT** work center.
